

## 23. SHOW COUNTINFO - REVISION 003

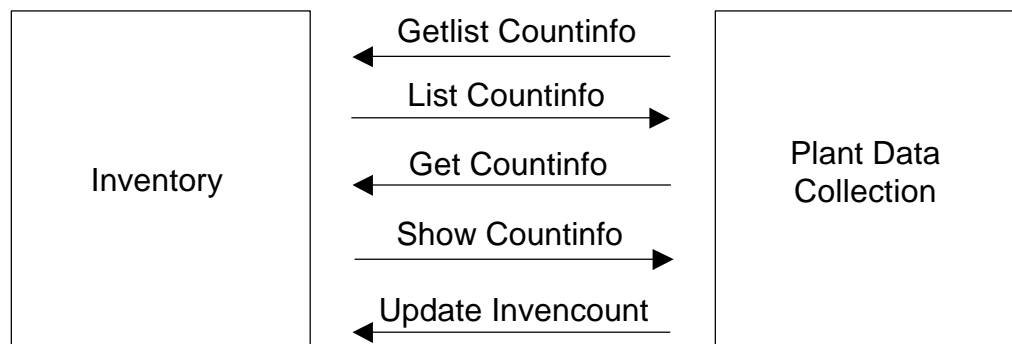

---

### 23.0 Overview

This chapter describes the Business Service Request named SHOW COUNTINFO. The Verb is SHOW and the Noun is COUNTINFO.

The purpose of the SHOW COUNTINFO Business Service Request is to enable an Inventory application system to send inventory count information to a PDC or other application system. This request may be used as a response to a GET COUNTINFO request or as a push notification of an event. There are many possible business applications in several environments that may use this capability.

This BSR may be used individually, or as part of a larger interface scenario. The picture below visualizes one possible use of this BSR.

## 23.1 Show Countinfo

The SHOW COUNTINFO Business Service Request uses one Data Type. This Data Type represents the Inventory Count Document that an ERP system generates and the PDC or other application system is requesting.

1. **INVDOCUMNT** - This Data Type contains the information in an Inventory Count Document. This Data Type is required.
