

53. LIST REQUISITN - REVISION 002

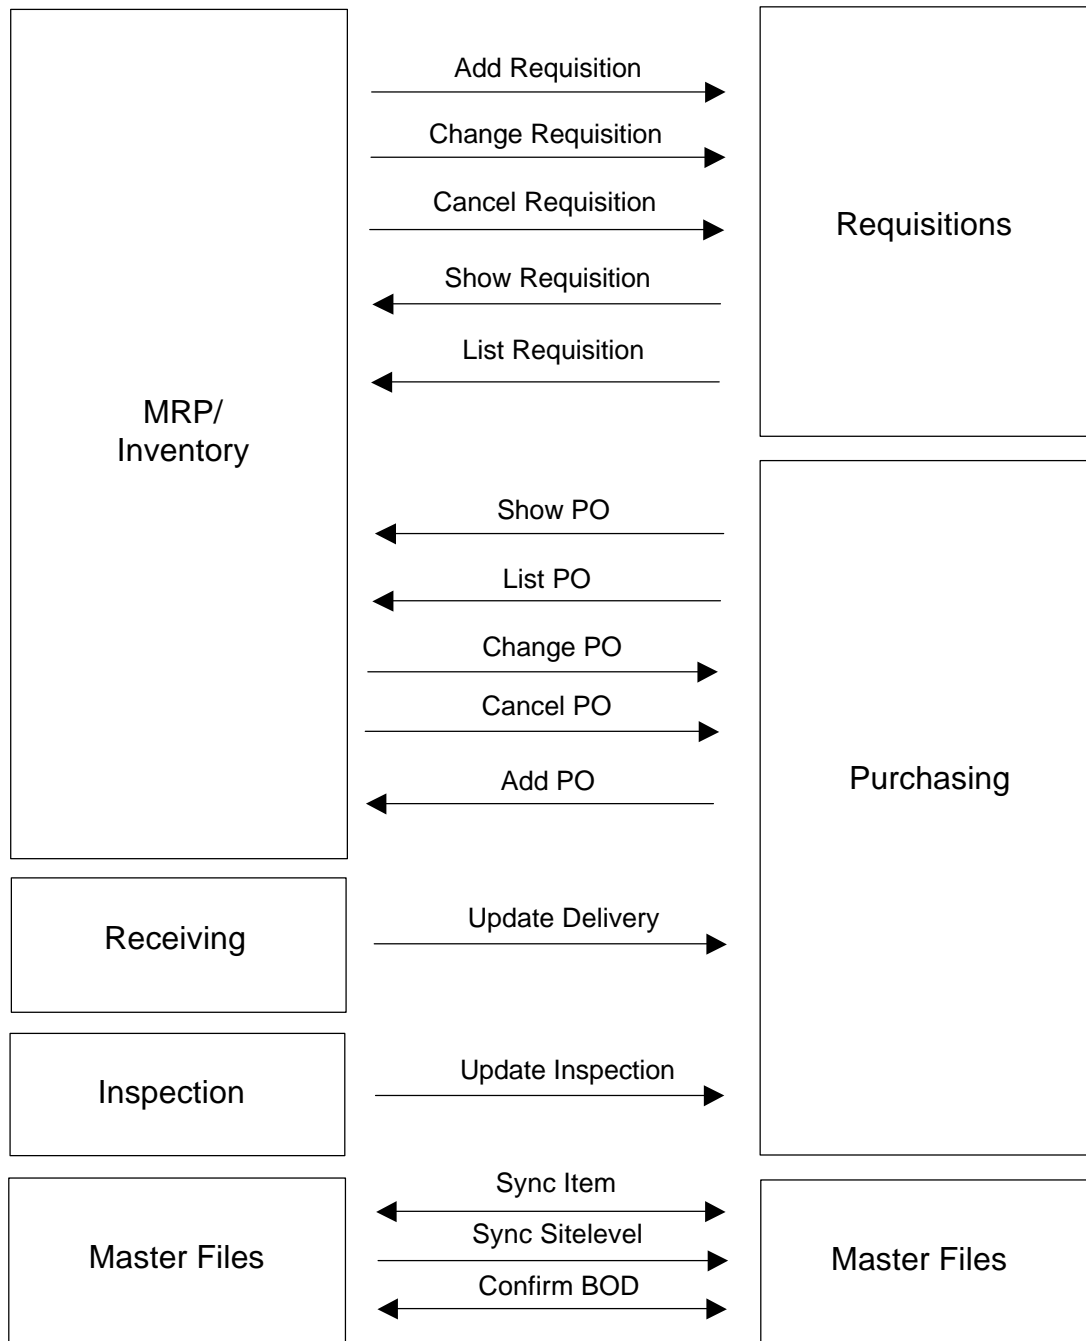

53.0 Overview

This chapter describes the Business Service Request named LIST REQUISITN, the Verb being LIST and the Noun being REQUISITN.

The purpose of the LIST REQUISITN Business Service Request is to send information relative to demand for goods or services to another business application. This may be in response to a GETLIST REQUISITN request, or it may be a notification vehicle, initiated upon an event in a business application.

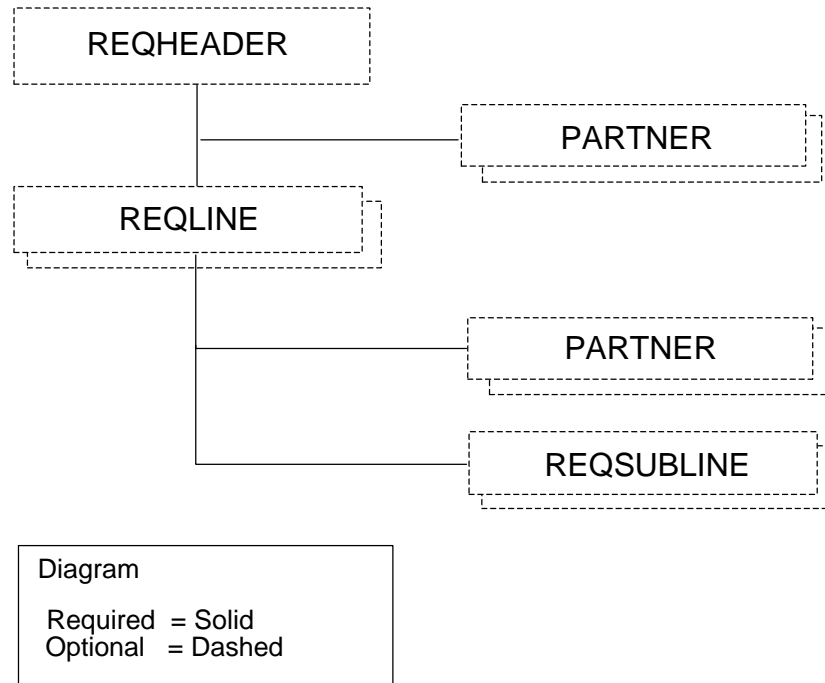

The LIST verb describes the behavior of supplying one or several documents in a summary format to the requesting business application. These listings of information may be supplied for requisition documents, or requisition lines and/or requisition sub lines.

This BSR usually does not cause updates to occur and may be used as part of a larger integration scenario or as a single tool for communicating demand. The picture below visualizes a possible use of this BSR.

53.1 LIST REQUISITN

The LIST REQUISITN Business Object Document consists of the following components:

The Business Service Request **LIST REQUISITN** uses the following Data Types.

1. **REQHEADER** - Information that applies to the Requisition. This Data Type is optional.
2. **PARTNER** – Partner information including partner id, name, currency, etc. This Data Type is optional.
3. **REQLINE** - Information that describes the requested item and its attributes. This Data Type is optional.
4. **REQSUBLINE** - Used if the item on the REQLINE needs to be divided into smaller units such as sub-components or subassemblies. This Data Type is optional.

53.2 REQHEADER

The Data Type, “**REQHEADER**”, is the first Type the Business Service Request “**LIST REQUISITN**” uses.

Listed are all the Field Identifiers and Segments that are valid for use within the REQHEADER Data Type. The first column of the table indicates the name. Segment names also include the Qualifier in parenthesis.

The second column indicates in which OAGIS Appendix the data is described, basically if the data is a Field Identifier or a Segment. Details of the Field Identifiers can be located in Appendix C, and details of the Segments can be located in Appendix D.
