

# 39. SHOW PERSONNEL - REVISION 003

---

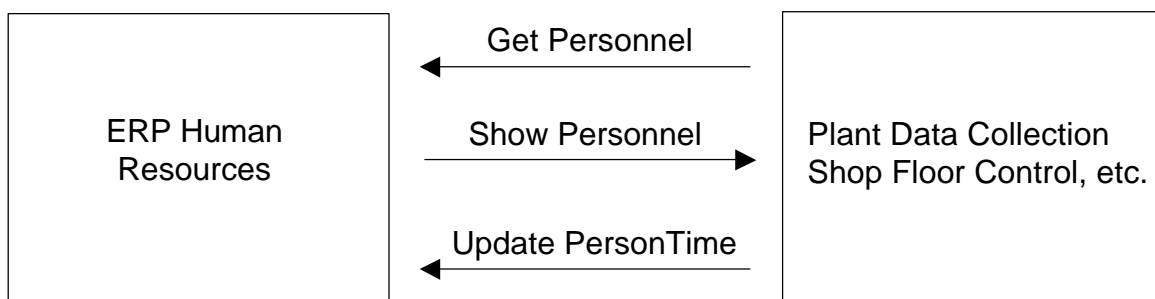

## 39.0 Overview

This chapter describes the Business Service Request named SHOW PERSONNEL, the Verb being SHOW and the Noun being PERSONNEL.

The purpose of the SHOW PERSONNEL Business Service Request is to provide Personnel data for a worker to a requesting business application. This BSR may be in response to a GET request, or it may be triggered by a business event.

This BSR will not usually cause updates to occur.

This BSR may be used individually, or as part of a larger interface scenario. The picture below visualizes a possible use of this BSR.

---

## 39.1 SHOW PERSONNEL

The SHOW PERSONNEL Business Object Document consists of the following Data Type:

1. **PERSONNEL** - Contains personnel Information about a worker. This Data Type is required.

---

## 39.2 PERSONNEL

The Data Type, "**PERSONNEL**", is the only Data Type the Business Service Request "**SHOW PERSONNEL**" uses. The PERSONNEL refers to a picking document that is generated in an ERP shipping module.

Listed are all the Field Identifiers and Segments that are valid for use within the PERSONNEL Data Type. The first column of the table indicates the name. Segment names also include the Qualifier in parenthesis.

The second column indicates in which OAGIS Appendix the data is described, basically if the data is a Field Identifier or a Segment. Details of the Field Identifiers can be located in Appendix C, and details of the Segments can be located in Appendix D.

The first table represents required data.

REQUIRED PERSONNEL DATA	
NAME	APPENDIX
EMPLOYEEID	C

The second table describes data that is optional.

OPTIONAL PERSONNEL DATA	
NAME	APPENDIX
